SUMMARY

Software engineer with 5 years of experience delivering production systems on Azure and .NET. Builds custom AI agents and MCP server integrations for small business clients and owns infrastructure, integrations, and security for a national retail co-op's storefront platform. Works directly with customers from requirements through deployment and on-call support.

TECHNICAL SKILLS

AI/LLM: Custom AI agents, MCP (Model Context Protocol) server design and integration, LLM API integration, agent orchestration, prompt workflows, Claude, GitHub Copilot, n8n, Botpress

Languages & Frameworks: Python, TypeScript, JavaScript, C#/.NET, Node.js, SQL/T-SQL, Java, ASP.NET MVC, React.js, Java Spring

Azure: App Service, Azure Functions, Container Apps, Container Registry, Blob Storage, Service Bus, Event Grid, Key Vault, Entra ID (managed identities), Azure SQL, Cosmos DB, Azure Monitor, Cost Management

Integration & Data: REST APIs, webhooks, OAuth 2.0, microservices, PostgreSQL, Supabase, MongoDB, Redis, third-party API integration (Square, ServiceTitan, Google)

Cloud/Infrastructure: AWS, Google Cloud Platform, Docker, Nginx, Linux, VNets, NSGs, private endpoints, Application Gateway, Front Door, CDN, autoscaling, high availability, DNS/SSL

DevOps/CI-CD: GitHub Actions, CI/CD pipelines, monitoring and observability, alerting and incident response, cloud cost optimization, Git, Agile/Scrum

EXPERIENCE

Software Engineer

February 2023 – Present

Ace Hardware Corporation

Oak Brook, IL

- Won first place in Ace Hardware's IT hackathon for an AI coaching assistant that gave HVAC service representatives in-call guidance and live translation, then analyzed recordings to surface upsell opportunities. Presented to the CEO and now an active company project.
- Led the performance and caching architecture for Ace's franchise and corporate storefronts, implementing multi-instance Redis, Azure Blob image caching, and middleware optimization that cut page load times by 98%.
- Integrated ServiceTitan authentication and the Google Reviews API to deliver real-time service data to franchise storefronts nationwide under third-party auth and rate-limit constraints.
- Architected and delivered 30+ RESTful APIs for the Paint Redesign and Home Services platforms, defining service contracts and integration patterns now used across franchise and corporate systems.
- Led security hardening across Ace online applications: migrated service account credentials to Azure Key Vault, modernized authentication to Entra ID managed identities, and set secret-handling standards adopted on every web property.
- Built a reusable React component library adopted across Ace web properties, eliminating duplicated front-end work and enforcing brand consistency.
- Containerized applications with Docker and built GitHub Actions CI/CD pipelines to standardize releases across environments. Configured Azure Monitor alerting to on-call mobile notifications and led Azure cost optimization.

AI Solutions Engineer

December 2025 – Present

Momento Automation LLC

Remote

- Build custom AI agents and MCP server integrations that automate client intake, document handling, and notification workflows for paying small business clients.
- Gather requirements directly from business owners, scope the work, and deliver each build end to end through architecture, implementation, and rollout.
- Operate webhook-driven pipelines integrating Square, Supabase, and email notification, and own production infrastructure and incident response for live client systems including OAuth 2.0, hosted PostgreSQL, and DNS/SSL.

Software Engineer (Contract)

June 2022 – January 2023

NetCashPro

Chicago, IL

- Replaced a manual financial reporting process by scoping and delivering a CFO Analysis application (ASP.NET MVC, C#) that automated profit/loss, cash flow, and revenue calculations from Excel and ERP sources.
- Built the REST API layer and React reporting front end with real-time data visualizations used directly in client financial decisions.
- Owned AWS deployment with testing and code-review gates to ensure performance and reliability.

Software Engineering Intern

May 2021 – August 2021

Orblogic (HRMatrix)

Upper Saddle River, NJ

- Delivered 20+ RESTful APIs serving 50+ client websites, improving performance and scalability.
- Reduced API response times 30% through endpoint and query optimization across major client projects.
- Contributed to microservices architecture design in an agile Scrum team, working directly with clients to align technical decisions with business goals.

EDUCATION

M.S. in Computer Science

Georgia Institute of Technology

In Progress, Expected 2028

Atlanta, GA

B.S. in Computer Science

University of Illinois Chicago

May 2022

Chicago, IL
